

Viewing Protocol for Analyzing Digital Stories

Judith Rance-Roney

1. View the story and discuss the main idea and thesis.

2. View the images and visual effects that are used with the sound turned off.

3. Ask students to close their eyes and focus on the voice and the music/sounds.

4. View the story holistically one more time and discuss how the individual elements (visuals, movement, voice, music) supported the main idea and thesis.
